

BUILDING COMMUNITIES THROUGH RESIDENT WELLBEING AND SATISFACTION

For White Oak Partners, caring about their residents is crucial for long-term success and achieving sustainability goals. Prioritizing resident satisfaction and wellbeing can improve retention, reduce vacancies, and increase property value. Caring about residents also means promoting sustainable practices, such as energy efficiency, waste reduction, and environmentally friendly materials. These initiatives can not only benefit the environment but also promote social responsibility and demonstrate the company’s commitment to the community.

30%

of our portfolio has been awarded the Kingsley Excellence Award by GraceHill for exceeding the Kingsley Index industry benchmark for overall resident satisfaction.

ONE

of our Florida assets has been awarded a Fitwel 1 Star Rating. This project incorporates a number of evidence-based design and operations strategies that support the physical, mental, and social health of occupants.

Our onsite teams go above and beyond to guarantee our residents are satisfied with their living experience!
